## ABOUT US

## OUR INSPIRATION

**Gems** are earth's natural treasure,  
and they **act in a positive way in our minds, body and spirit.**

**They connect us to healing sources of nature** and with the cosmic  
power from which everything emanates.

**The stones work by giving and receiving energy**, purifying,  
harmonizing and providing its circulation in our physical or etheric  
bodies....

....the perfumes on the other hand send us to a  
sensorial imaginary universe.

When they spread around, they transmit messages, bring  
back memories, **unify luxury with seduction and  
enchantment.**

The colors and fragrances translate nature in full, spiritly  
and sensorial....

....Di Pietro introduced a line of **fragrances**, where each **essence were developed according to the properties of each natural crystal....**
